

PROFESSIONAL SUMMARY

[No Visa Sponsorship Required in France – Open to relocation (EU)]

Business Data Analyst with **5+ years of experience** in operational, product, and performance analytics across **large-scale digital platforms**. Proven track record of **building KPI frameworks**, **decision dashboards**, and **analytical workflows** that improve vendor performance, operational efficiency, and cross-functional decision-making. Delivered measurable impact through **experimentation**, **process optimization**, and **data-driven interventions**, including significant reductions in cancellations, issues, and service delays.

JOB EXPERIENCE	SKILLS
Senior Business Data Analyst Business Data Analyst SnappFood Online Food Delivery Platform Jun 2025 – Apr 2026 Nov 2023 – Jun 2025 • Designed vendor-performance pipelines, KPI frameworks, & dashboards for a 40M+ user platform. • Led design, rollout, & expansion of the Reward & Cost framework, translating vendor-performance logic into scalable workflows for cost calculation, rewards, vendor eligibility, & monthly reporting. • Standardized core operational KPIs to create a consistent measurement layer for reporting, dashboards, and downstream performance models. • Automated recurring analytics and reporting workflows using SQL, Python, Excel, and Tableau. • Built vendor segmentation, scoring, and intervention models to identify underperforming cohorts and support targeted E-CRM, onboarding, training, and performance-improvement programs. • Designed and evaluated experiments and operational interventions across E-CRM campaigns, reward mechanisms, and training flows to improve conversion, engagement, order performance. • Drove measurable performance gains through data-led actions, reducing cancellations by 53%, issues by 57%, and delays by 52%, while increasing vendor satisfaction from 37% to 58%. • Developed incident-detection logic to identify platform-driven KPI shocks and support fairer downstream treatment in Vendor Performance Scoring and Reward & Cost workflows. • Partnered cross-functionally with Product, Marketing, Operations, Finance, BI, & leadership teams to turn analytical insights into scalable programs, product requirements, and operational decisions.	SQL (Advanced) BigQuery, Snowflake, PostgreSQL Python (Pandas, NumPy, Matplotlib) Exploratory data analysis Statistical analysis Anomaly detection Forecasting Tableau, Power BI, Looker KPI design Dashboard design Metric definition Performance tracking ETL / ELT Dimensional modeling Data pipelines Data cleaning Data validation Workflow optimization A/B testing Cohort analysis Funnel analysis Product and Marketplace analytics Process mapping Operations analysis Vendor lifecycle analytics Supply chain analytics Git, GitHub Jira / JQL Advanced Excel, Google Sheets Azure/AWS data services (familiarity) Microsoft Fabric (exposure)
Data Analyst Intern Rahnema College Data Analysis Bootcamp Aug 2023 – Oct 2023 • Collaborated on an NYC bike-sharing optimization project with the “StatStoryTellers” team. • Analyzed traffic, supply-demand imbalance, & trip behavior to identify operational improvements. • Supported strategy recommendations for bike allocation, advertising, and maintenance.	
Machine Learning Intern Hamtech Jan 2022 – May 2022 • Contributed to a Bitcoin price prediction project using Twitter API and ML techniques. • Supported feature engineering, data preparation, and predictive model refinement. • Presented findings on the value of social media signals for financial forecasting.	
Teaching Assistant Kharazmi University Dec 2018 – Jul 2019 • Supported graduate teaching in Advanced Production and Operations Management. • Facilitated assignments, discussions, problem-solving activities, and student evaluation.	
Visual Merchandiser Debenhams British Department Store May 2017 – Feb 2018 • Managed visual merchandising and product presentation to improve customer experience & sales.	
Textile Engineer Intern Dastranj Baft Polyester Manufacturers Jul 2016 – Sep 2016 • Supported polyester yarn production, laboratory testing, and quality control activities.	
Sales Consultant Debenhams British Department Store May 2014 – Feb 2015 • Supported customer-facing retail operations, sales, and in-store experience.	
RESEARCH EXPERIENCE	LANGUAGE SKILLS
G-SCOP Laboratory Grenoble-INP UGA Feb 2025 – Jul 2025 • Developed an ethical framework for manufacturing systems, including risk mapping and decision checkpoints • Designed human-in-the-loop architectures to improve traceability, accountability, and control.	English Professional working proficiency French Elementary proficiency
Management & IT Department Kharazmi University Feb 2020 – Mar 2022 • Conducted master’s thesis research on stock market prediction using ML and deep learning approaches.
